

FortiMail™ is a specialized email security system that provides multi-layered protection against blended threats comprised of spam, viruses, worms and spyware. The FortiMail system relies on a customized operating system that cleans emails through corresponding FortiMail antispam, antivirus and antispymware engines that protect against blended threats. To ensure up to date email protection, FortiMail relies on Fortinet FortiGuard™ antivirus, antispymware and antispam security subscription services that are powered by a worldwide 24x7 Global Threat Research organization. FortiMail provides unparallel deployment flexibility and powerful bi-directional email routing, QoS, virtualization and archiving capabilities with a lower total cost of ownership.

Multi-Layered Email Security

- ✓ Complete Multi-Layered Security
- ✓ Deployment Flexibility
- ✓ Lower Cost of Ownership vs Competition
- ✓ Advanced Archiving, Logging & Reporting

Platform Family

FortiMail-100

FortiMail-400

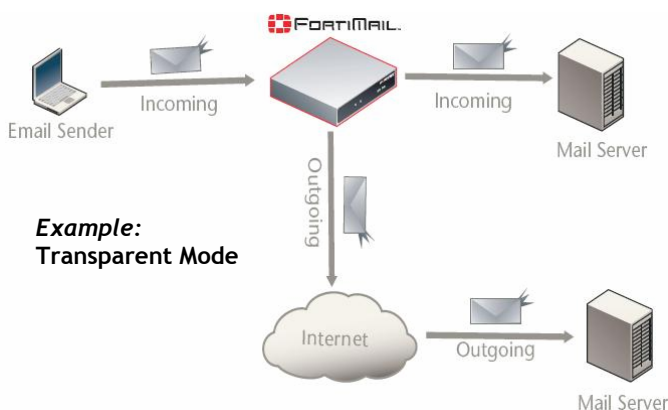

FortiMail-2000A

FortiMail-4000A

Easy Installation

KEY HIGHLIGHTS

FortiMail Multi-Layered Security Platforms

- High-performance, full-featured security solutions
- Antispam, antivirus, antispymware and antimalware
- Intelligent routing, QoS, virtualization, and inbound / outbound SMTP routing policies

Feature	FortiMail			
	100	400	2000A	4000A
10/100 Ethernet	4	6	0	0
10/100/1000 Ethernet	0	0	4	2
Total Hard Drive Capacity	250GB	500 GB	to 2.4 TB	to 4.8 TB
RAID Modes	n/a	0,1	0,1,5,10,50	0,1,5,10,50
Redundant Hot Swap PSU	n/a	n/a	Yes	Yes
Email Domains	50	500	3000	3000
Incoming mail policy /Domain	20	40	100	100
Outgoing mail Policy	50	500	1500	1500
Server Mode Mailboxes	200	1000	3000	3000
Tiered Admin Domains	5	25	50	50
Antispam / Antivirus Profiles	60	175	550	550
Authentication Profiles	60	175	550	550
Content Profiles	60	175	550	550
Email Aliases	256	256	256	256
SMTP Connections	128	256	512	512
Performance (messages / hr)	(RAID 0)	(RAID 1)	(RAID 10)	(RAID 10)
- Email Routing	64800	187200	331200	345600
- Antispam	57600	162000	288000	302400
- Antispam + Antivirus	54000	154800	280800	295200

High-Performance Messaging Engine

- Standards-based Mail Transfer Agent (MTA)
- Tightly integrated with FortiMailOS security solutions

FortiGuard Services

- World-wide network of security update distribution servers continually updates antivirus signatures and antispam databases to maintain the highest levels of protection

Deployment Flexibility

- Support for Transparent, Gateway or Server operating modes for seamlessly integration into existing networks

High Reliability / Availability

- Models available with hot swappable power supplies and flexible RAID storage configurations
